Sir:

Prior to examination, please further amend the above-identified application as follows:

IN THE CLAIMS:

Please cancel claims 10-12 without prejudice or disclaimer.

Please enter the following amended claims:

1. (Amended) A method of generating a private key signature in respect of user data using a token, the token having stored therein a private key and a symmetric key, said method comprising the steps of

- B₁
- a. providing the user data or a representation thereof as an input to a symmetric key operation supported by the token,
 - b. retrieving the output of the symmetric key operation as the token signature; and
 - c. combining the token signature with the user data or representation to generate the token bound output data; and
 - d. providing the output data as an input parameter to a private key signature generation operation, to form a private key signature for the user data.
